EDUCATION

Master of Computer Science

Arizona State University, Tempe, AZ

May 2024

GPA: 4/4

Bachelor of Engineering in Information Science and Engineering (IT)

Visvesvaraya Technological University, India

July 2019

GPA: 7.96/10

TECHNICAL SKILLS

Programming Languages: Python, Basic Java, Typescript, Bash | **Front-End:** HTML, CSS, Angular | **Tools, Databases, and OS:** MySQL, Windows, Linux | **DevOps Tools:** Jenkins, Ansible, Terraform, Docker, Git, GitHub, Artifactory, Confluence, Jira, Kubernetes, EC2 | **Monitoring:** Prometheus, vROps, Grafana | **Virtualization:** VMware

PROFESSIONAL EXPERIENCE

Site Reliability Engineer, NetApp | Research Triangle Park, NC

September 2024 - Present

- Developed a health monitoring API using Flask to track application service status, reducing downtime and improving observability.
- Designed and implemented custom monitoring and alerting solutions for GENAI applications using Grafana, Prometheus and Blackbox exporter.
- Conduct weekly Validation and deployments of CIT application.

Software Engineer Intern, Tesla, Inc | Palo Alto, CA

January 2024 - May 2024

- Enhanced the **BCM**(Bright Cluster Manager) exporter by integrating additional metrics for improved functionality and performance.
- Implemented **Blackbox Exporter** and **Redfish Exporter** monitoring solutions for DNS resolution, HTTP endpoints, and hardware metrics; integrated with Prometheus, reducing incident response time by 30%.
- Managed **HPC** cluster infrastructure, focusing on systems automation, configuration management, and large-scale deployment, resulting in a 20% increase in operational efficiency.
- Revamped Prometheus monitoring target population by integrating devices from **Netbox**, expanding monitoring coverage by 40%.
- Engineered a **Python script** for detecting cabling issues by cross-referencing Netbox and **LLDP** data, reducing network downtime by 25%.
- Created customized **Prometheus** metrics for LLDP neighbors, improving network monitoring accuracy by 15%.

ETS Linux Support, Arizona State University | Tempe, AZ

October 2022 - December 2023

- Automated configuration and installation of applications and software for diverse academic units using **Ansible AWX**, **Bash**, and **Python** scripts, achieving significant efficiency gains.

Software Developer Intern, ESRI | Redlands, CA

May 2023 - August 2023

- Developed Ansible playbooks to automate infrastructure provisioning, configuration management and application deployment, resulting in a 60% reduction in deployment time.
- Collaborated with development and testing teams to create CI/CD pipelines using **Jenkins**, **Git** and **Ansible** for fast and reliable application deployments.
- Devised a **Docker**-based containerization strategy, enabling seamless application deployments and scalability.

Software Engineer, Bosch Global Software Technologies Pvt Lmt | Bengaluru, India

August 2019 - July 2022

- Utilized project management software **JIRA** to track the progress of the project and **Git** for version control.
- Automated BAU activity using **Jenkins**, **Bash**, **Python** and **PowerShell** scripts, achieving a 50% reduction in manpower.
- Provisioned VM setups in vCenter through **Terraform**.
- Created **Ansible playbooks** to configure Red Hat servers.
- Led the upgrade of **ESXi** servers to address a critical vulnerability, managing the entire change ticket process, securing approval, and coordinating with customers across four regions.
- Installed patches, Software upgradation and performed backup for ESXi, Windows and Linux servers.
- Designed and developed modular and reusable front-end components using Angular11, Typescript and Angular Material.
